## CAREER SUMMARY

Enthusiastic and detail-oriented front-end developer with a strong foundation in HTML, CSS, JavaScript, and modern front-end frameworks. Recently graduated with a focus on web development, complemented by hands-on experience from completing various projects and certifications, including those from Udacity. Passionate about creating responsive, user-friendly web applications and eager to contribute to a dynamic team. Seeking to leverage my skills in a challenging role to grow and innovate in the field of front-end development.

## SKILLS AND STRENGTHS

- **HTML5 & CSS3:** Proficient in creating semantic, accessible, and responsive web pages.
- **JavaScript (ES6+):** Strong understanding of JavaScript fundamentals, including DOM manipulation and event handling.
- **React.js:** Experienced in building dynamic and interactive user interfaces using React.
- **Tailwind CSS & Bootstrap:** Skilled in using utility-first frameworks like Tailwind CSS and component-based frameworks like Bootstrap for responsive design.
- **Sass (Syntactically Awesome Style Sheets):** Proficient in using Sass for writing maintainable and scalable CSS.
- **MUI (Material-UI):** Familiar with Material-UI for implementing Google's Material Design in web applications.
- **Firebase:** Experienced with Firebase for backend services, including authentication, database, and hosting.
- **npm (Node Package Manager):** Knowledgeable in using npm for managing dependencies and automating workflows.
- **Responsive Design:** Expertise in crafting mobile-first designs and ensuring compatibility across various devices.
- **Version Control (Git & GitHub):** Proficient in using Git and GitHub for version control and collaboration.
- **Web Performance Optimization:** Knowledgeable in optimizing web pages for speed and performance.

- **Cross-Browser Compatibility:** Ability to ensure consistent user experience across different browsers and devices.
- **Debugging & Problem-Solving:** Strong analytical skills for troubleshooting and resolving front-end issues efficiently.
- **Attention to Detail:** Keen eye for design aesthetics and user experience, ensuring pixel- perfect implementations.
- **Collaboration & Communication:** Effective in working within a team environment and communicating technical concepts clearly.

## Projects

- Weather App – A responsive weather app that fetches real-time weather data for multiple cities.
- Dashboard App – An interactive, data-driven dashboard built with React for visualizing metrics.
- Netflix Clone – A clone of Netflix, featuring UI components, dynamic content fetching, and responsive design.
- E-commerce Platform – A scalable e-commerce solution with product listings, filtering, and shopping cart functionalities.
- The Web Father

## Certifications

- **Front-End Web Developer Nanodegree - Udacity**  
September 2022

<https://www.udacity.com/certificate/KY5VCYLA>

- **THE WEB DEVELOPMENT CHALLENGER TRACK Nanodegree - Udacity July 2022**

## EDUCATION

Graduate of the Faculty of Commerce, Cairo University ,2024
